

FLOORING

PAVIM

PAVIM is a special floor for the area underlying hand-washing units where it is essential to have a dry anti-slip surface for safety reasons.

It consists of a tank covered by a grating - both of them in stainless steel - and is available in different lengths: 70, 140 and 210 cm.

PAVIM is installed at floor level and can be inspected for maintenance and cleaning by simply removing the grating.

TECHNICAL DETAILS:

Sizes available:

PAVIM/70 :	70x40x8 cm
PAVIM/140 :	140x40x8 cm
PAVIM/210 :	210x40x8 cm
