

ELECTRONIC TAPS FOR WASHBASINS**M204**

Electronic tap devised in order to make old installations equipped with wall-mounted manually-operated taps for cold or premixed water comply with the regulations in force.

Fixed spout available in two different sizes: 20cm or 25cm. Hydraulic parts in solid brass.

Infrared electronic circuit with built-in automatic shutoff system housed inside the tap and fixed to a solenoid valve patented by SOEMA.

Equipped with: 220/12Vac safety transformer approved by IMQ. CE certified.

TECHNICAL DETAILS:

Operating time:

Water delivery :

As soon as the user's hands are detected.

Water delivery interruption :

1" after the user's hands are removed or after 60" of continuous functioning (Automatic Shutoff System)

Specifications:

Operating pressure :

1 - 10 bar

Power :

220/12Vca 10VA Transformer Class II IP40

Water flo at 3 bar :

8 l/min

ELECTRONIC TAPS FOR WASHBASINS**M204/20T - M204/25T**

Wall-mounted electronic tap for cold or premixed water.
Outer casing with chrome finish and hydraulic parts in solid brass.
Infrared electronic circuit with built-in automatic shutoff system housed inside the tap together with a solenoid valve and a 6 l/min flow regulator.
Equipped with a 220/12Vac safety transformer approved by IMQ and an inspectionable stainless steel filter. CE certified.
