

FLOORING

**PAVIMOR**

PAVIMOR is a special floor for the area underlying urinals which has been devised in order to ensure the highest hygiene as well as easy cleaning and maintenance.

It consists of a floor-recessed tank equipped with spraying nozzles covered by a grating. Both the tank and the grating are in stainless steel. It is available either in the single-tank version or in the multi-tank version. The distance between the centres of the tanks is of 70 cm for a maximum length of 210 cm.

PAVIMOR is combined with urinal mod. ELLIPSE/3, equipped with a special electronic control operating the floor-washing system after each flushing of the urinal.

The single-tank version (70 cm) can also be combined with electronic WC flushing systems such as VAIDIM/6 (flushometer) or VAIDIM/9 (flushing cistern) as an alternative to PAVIM WC.

The tank can be inspected for maintenance and cleaning by simply removing the grating.

TECHNICAL DETAILS:

Size available:

PAVIMOR/70 :	70x40x8 cm
PAVIMOR/140 :	140x40x8 cm
PAVIMOR/210 :	210x40x8 cm
